**Excellent scratch & smear resistance**

**Excellent image darkness**

**Excellent adhesion to many substrates**

**Recommended for high temperature sterilization applications & refrigeration storage**

**Best Color  
Hot Stamping Foil Solution**

Zhuorim's hot stamp coding foils are used to mark onto product packaging by means of a coding device. Typical marking applications include date coding, lot numbers, production information, price, etc. As the largest hot stamping ribbon manufacture in China, Zhuorim provides a complete line of coding foils offering superior performance, capable of low energy printing at high speeds, and compatible with a wide range of substrates. As an ISO 9001 certified manufacturer, Zhuorim provides strict quality control standards to ensure a consistent and reliable high performance product for use in mission critical packaging applications. **SCF Colors available in White, Yellow, Blue, Red, and Green. Custom sizes and colors are available.**

### World's Only Vertically Integrated TTR Manufacturer
